About

I'm an **architect** transitioning into **software development**. Through my studies at **Hive Helsinki**, I've built a solid foundation in **C, C++, and Python**, focusing on algorithms, data structures, and problem-solving.

My design and project management background trained me to:

- Think **systematically**
- Collaborate across **multidisciplinary** teams
- Deliver **precise, reliable, and efficient** technical solutions under tight deadlines

Tech Stacks

Lauguges

C, C++, Python, Bash, Makefile

Tools

Linux, Virtual Machines, Debian, Git

Web Development

HTML, REST API,

Office

Slack, teams, discord, Microsoft

Design

AutoCAD, 3d-modeling, Adobe Suite, rendering engines

Educations

Hive Helsinki FI, 2024 –

Software Engineering

Aalto University FI, 2019 – 2021

Master of Science in Architecture

Southeast University CN, 2014 – 2019

Bachelor of Science in Architecture

Iowa State University USA, 2018

Exchange study

Languages

Chinese Native

English / Finnish professional

Certifications

- Introduction to Programming (Python) University of Helsinki
- Finnish Proficiency Test, Level 3
- English Proficiency Test, IELTS 7.5

Interests

GIS and mapping, Urban data, Visualization, Laser-cutting, 3d-printing, Photography

Programming Projects (Hive Helsinki)

Mini-libft – C

Reimplemented core C-standard library functions from scratch to build a foundational library for later 42 projects.

Minishell – C

Simplified Bash shell clone implementing pipelines, redirection, and environment variable expansion using Unix system calls.

MiniRT – C with MLX42

Developed a lightweight ray tracer rendering 3D scenes with basic 3d objects; implemented lighting, shadows, and reflections.

CoinDigger– Python

Built a small 2D grid-based game, demonstrated basic game logic, event handling, sprite rendering, and state management using Pygame's core modules.

C++ Modules – ongoing (5 / 10)

Explored object-oriented programming through modular exercises on classes, inheritance, polymorphism, templates, and memory management.

Safe Lauttasaari – ongoing, full-stack

Building a full-stack project displaying road construction data in Lauttasaari. Designed with accessibility in mind, the website provides audio alerts and user reports.

Work Experience

Project Architect, Helsinki, 1. 2023 – now

Architecture Office Eero Korhonen Oy.

- Lead architectural design from concept to implementation.
- Collaborated with multidisciplinary engineering teams
- Coordinated between contractors and clients

Architect, Espoo, 1.2022 – 12.2022

Architecture Office Pet Michael Oy

- Designed housings and applied building permit.

Assistant Architect, 9.2020 – 12.2022`

H-K Architects, Helsinki / Powerhouse Company, Rotterdam

- Assisted in urban design and competition projects.
- Produced 3D visualizations and presentation materials.
